PROFILE

Experienced Software Developer skilled in designing, developing, testing, and maintaining high-quality software solutions. Equipped with a diverse and versatile skill set, with expertise in SaaS application development, mobile and web technologies, and database management. Proficient in multiple programming languages and frameworks, with hands-on experience in agile development environments. Adept at utilizing the latest cutting-edge tools and methodologies. Capable of efficiently managing independent projects while excelling in collaborative, team-driven environments.

EMPLOYMENT HISTORY

Apr 2021 — Sep 2023	Software Engineer, Proitzen	Colombo, Sri Lanka
Developed and maintained applications using the Dart programming language and Flutter framework, ensuring high performance and a seamless user experience. Served as the main developer for the KinderM8 Family Lounge app, a SaaS platform, where I designed and implemented brand-new user interfaces to enhance usability and engagement. Optimized application performance, reducing load times by 30% and improving responsiveness. Collaborated effectively within an agile development environment, working alongside senior developers, project managers, and cross-functional teams to deliver scalable and efficient software solutions. Started as an Associate Software Engineer and was promoted to Software Engineer for demonstrating exceptional technical skills and leadership.		

INTERNSHIPS

Jul 2018 — May 2019	Trainee Software Engineer, Kingslake Engineering Systems	Colombo, Sri Lanka
Gained hands-on experience in developing and maintaining applications using JQuery, Progress Rollbase, and Progress OpenEdge 4GL. Worked in an agile development environment, collaborating closely with senior developers and project managers. Played a key role as a developer in the 'StoreSmart' project by identifying and resolving over 50 system bugs, improving system stability and reducing reported issues by 40%.		

EDUCATION

Sep 2023 — Sep 2024	MSc Data Science, York St John University	London
Graduated with Merit, gaining comprehensive knowledge in data analysis, machine learning, statistical modeling, and big data technologies. Developed practical experience in data processing, predictive modeling, and data visualization through hands-on projects and coursework, applying advanced techniques to solve real-world problems.		
Jan 2017 — Jan 2020	BEng (Hons) Software Engineering, University of Westminster	
Graduated with Upper Second-Class Honours (2:1), gaining strong expertise in software development, data structures, algorithms, and system design. Developed hands-on experience in mobile and web application development, database management through academic projects and practical coursework.		

SKILLS

Software Development Fundamentals	Experienced	Problem-Solving & Debugging	Expert
Agile Development & Collaboration	Experienced	Quick Learning & Adaptability	Expert
SaaS Application Development	Experienced	Communication Skills	Expert

COURSES

Sep 2024 — Feb 2025	IBM Professional Data Science Certificate, IBM
